Romans 15:1-2

We then who are strong ought to bear with the scruples of the weak, and not to please ourselves. Let each of us please his neighbor for his good, leading to edification.

own leader his messages is crystal clear
no that a country with no peace has
development but it has tribalism instead.

We must respect the government because it got its power from the Lord. By delegating and choosing aids, leaders and Presidents are partaking in divine power partition. We must therefore follow the lead set up from the ruling party FRELIMO so that we may free up ourselves from the shackles of economic and social colonization. The revolutionary parties of the frontline states must be supported and credited for their birth and safeguarding of independence as it was yesterdaywhen they were ordained to fight oppressors, where any future threats ,and tomorrow ”.of Pan Africanism may arise*

The Archbishop then urged church members to fight for their church in the face of false accusations and defamation *We are at a time “ ,of character. He said when people are jealous of J5. Yet the church is a proud supporter of the emancipation and sovereignty of a united African people. **How does Johane the 5th of

This unity and worshipping together destroyed the spirit of tribalism amongst African nations but encouraged the spirit of humanity and respect among other African

The holy spirit unto the Archbishop Doctor Andby Makururu had said that Africa must unite and work together because we are neighborhood countries and a country where there's no peace the holy spirit can not operate well

SOUTH AFRICAN PROPHECY

The Archbishop Doctor Andby Makururu has laid down a prophecy upon South Africa a prophecy posing as a warning to south Africa that the country should stop treating their fellow African brothers and sisters as enemies because

this is just a strategy used by our enemies to try and drive us apart fearing African unity in the country the Archbishop Doctor Andby South Africans to stop Makururu has urged killing their African brothers and sisters because this will cause problems in the country the country should rather focus on development and unity

Archbishop Doctor Andby Makururu Urges SADC Action on South Africa's Xenophobia Archbishop Doctor Andby Makururu has called on leaders of the Southern African Development Community [SADC] to urgently intervene in South Africa to contain the escalating xenophobia crisis, warning that inaction could have severe regional consequences. Speaking this in South Africa , Archbishop Doctor Andby Makururu said the SADC bloc must act decisively. “The SADC bloc has to intervene to curtail the worsening situation in South Africa. Neighboring

countries must convene and discuss possible solutions to the ongoing xenophobia crisis. It is important that the situation is resolved so that the nation of South Africa may not fall before our very eyes. By initiating dialogue with its neighbors, South Africa will gain key insights to address its ongoing challenges,” Archbishop Doctor Andby Makururu stated. According to the Archbishop Doctor Andby Makururu , xenophobic attacks in southern SADC have become life-threatening, particularly for people from different ethnic groups targeted mainly by Zulu perpetrators. Zimbabweans, Malawians, Mozambicans, Zambians and Nigerians among others, have reported harassment and insults. His Grace has also noted that the ongoing crisis affects all SADC nations because of South Africa 's role as a critical trading partner on the continent. Economic Freedom Fighters leader Julius Malema has echoed concerns over international silence. He argued that foreign governments and international organizations have been vocal on other global conflicts but have downplayed xenophobia in South Africa, a

stance he says serves their own national interests. Malema further urged Africans to avoid being divided by internal disputes, including xenophobia and tensions around spaza shop ownership and operations. He warned that such divisions distract from the continent's broader socio-economic challenges. "Af

ricans should remain united and focus on economic liberation, job creation, and improved living conditions, just as frontline states did in supporting the struggle against apartheid," Malema said. Archbishop Doctor Makururu also appealed to believers to pray for the African National Congress and its leadership. "We must pray for the ANC so that it may continue its revolutionary work. We must also pray for its leadership under President Cyril Ramaphosa," this is also the prophecy laid down by the Archbishop Doctor Andby Makururu in 2021

These were some of the statements taken from among members of the congregation of the Johan the 5th International Church of Africa.

*African unity will derive African growth and prosperity
let Africa unite*

Archbishop Doctor Andby Makururu

**The importance of African
Unity**

Africa is a continent that has a multitude of cultures, religion and traditions. *"We are stronger together than we are apart"*, these are the words spoken by mostly revolutionary leaders as they have pointed out there's strength in numbers, Africa has wealth within its people and culture. But with modernisation comes heavy losses as many African countries turn towards western life styles many cultures and Languages die out in African, Such as the language of Kwadi and Ajawa it has die out of its natural speakers. African Unity is a goal for some African leaders. The J5 congregation is an example of what African unity can look like, multiple cultures and languages coming together under one course and the celebration of one another and learning from each other to help improve one another. Members of the J5 congregation offer a helping hand to one another despite nationality, When this is adopted on a national scale African countries will not only thrive but they will prosper in ways never possible. And the suffering Africa that western media loves to display will be nothing

but a memory, Africans can be quick to hate their own people because of media display. Nigerians have been displayed as drug lords, Zimbabweans have been displayed as human traffickers and South Africans are displayed as supporters of tribalism. While media source show half the story they are those who choose unity and love over unnecessary violence, The unity of Africa can bring an end to tribalism and many more differences that we have against each other. The Archbishop Doctor Andrew Makururu has a vision of a united Africa that western countries envy, a united Africa that western countries seek aid and advice from it. If Africa doesn't unite Africa will cease to be, simply because foreign countries will approach a country at its weakest and offer a heavy loan and when they are unable to pay they will demand land as compensation. Africans ask yourself why is it that foreign investment aims at our continent?. Africa is not just wealthy in its culture and traditional, it has financial wealth as well Africa give the world a heavy sum of its raw materials. The same materials we can

turn into manufactured goods should we be united, Africa has over 100 countries majority of which provide raw resources to the world. There's a saying in southern africa that goes "*Maibuye iAfrica*", the land of Africa is often given to foreigners because of business deals that spoiled badly or unethical corporations for do not care about the lands history who only think of profit. While the world's evolving and constantly moving forward towards a digital age, land is an everlasting wealth that a man can give his children and with a united Africa we can leave everlasting wealth for the future generations to come.

Archbishop Doctor Andby Makururu

Church Leaders

Some of the most influential and impactful leaders we have in our countries are church leaders, they have hordes of people following

them and learning from them. While not all church leaders are great some have proven to be only greedy and they seek star attention. The Archbishop Doctor Andby Makururu encourages church leaders to unite and lead the people towards a prosperous future. He also encourages church leaders to work and respect the ruling party within the country so that they can create opportunities for the youth to learn skills that will help them in their future. Unity with the churches and the government will not only create skill improvement but also create job opportunities for those who are unable to reach the requirements for high-end jobs.

Unity of church leaders

Church leaders are the ones left with the influence to help people and lead them in their daily lives. Church leaders should unite together so that they can show their congregation that unity can start within their churches. Most of the world look towards churches for influence and inspiration if churches belittle and bad

mouth one another, people will not feel the need to be nice towards each other..Churches stand at the forefront of humanity and if the churches unite and stand together we can be assured that each and every person will be united under the same course and it will be easier to learn and offer aid to one another. The Archbishop Doctor Andby Makururu Himself is always telling church leaders and congregation that they should always pray for the government because Africa Is loved by God and church leaders should not confuse the congregation by trying to make the congregation turn on its country and the government of the country

Christianity and Culture

It is believed by some scholars that Jesus Christ followed and respected the culture of the jews, As it say the Holy Bible

Deuteronomy 18:18

[18] I will raise up for them a Prophet like you from among their brethren, and will put My words in His mouth, and He shall speak to them all that I command Him.

Jesus Christ was known as the king of the Jews and to lead people you have to know their culture. The words that our savior said it that

Seek out the kingdom of God

When Jesus told his followers he was the way, he was telling them of the way to seek out the kingdom of heaven. While many have their own understanding of the Bible and its scriptures there hasn't been a biblical scripture that tells people they should abandon their own culture or religion. But it was the opposite. God was angry with the Hebrews when they abandoned their religion and culture to pray to the gods of other religions. The Archbishop Doctor Andby Makururu sees African Culture and Christianity standing together hand in hand.

Religion and culture are two aspect of a human to help them be able to identify themselves, an example of this is when god introduces himself to his chosen he wouldn't say i am your god he would mention his chosens ancestors so that his chosen knows his culture and religion. The are church leaders who want their followers to abandoned their culture and embrace religion own its own, while this is not bad it is also not good because a person is only acknowledging one part of themselves and their ancestry is lost.

Ancestors

Many African cultures praise ancestors, while others have a connection to the spiritual world they could communicate with them. But in past ages Ancestry was used to remind or to show people from the lineage where they come from each ancestral ceremony was the celebration of their lineage and the life of those who came before them. Each and every era and lifetime will view ancestors with a different view and how they celebrate them, But the common

ground with all of them will always be that ancestors are those who came before you, ancestry is the lineage with you hail from and ancestry will always connect one with their culture and traditions.

Tradition and Culture.

While some people view culture and tradition as the same thing they are different, Tradition are aspects or rules that are passed down from generation to generation , traditions can die out without proper maintenance and care e,g :Zulu culture and Mkhize Tradition . Culture is openly reserved to a tribe while tradition is reserved to a specific clan.

**Let us not lose our culture and
heritage as Africans said the
Archbishop Doctor Andby Makururu**

The Archbishop Doctor Andby Makururu has taught his followers that we should not lose our ways as Africans because the ancestors of Africa shed blood and tears for our independence

therefore we should not adopt things that are not part of our culture leaders like Nelson Mandela, Robert Mugabe, samora machel, Thomas sankara and many more these are the people who did not get the chance we have today let us focus on building our own nation and the future of Africa if we do not use the opportunity given to us by God Africa will perish 50 years to come other continents will take over our continent our forefathers's sweat will be in vain said the Archbishop Doctor Andby Makururu

Archbishop Doctor Andby Makururu mentioned that we should build Africa to the level where other continents come to Africa not to help us but to ask for our help to ask us how do we build the nation what strategies do we use other continents should ask for our advice as Africa not the other way around let us restore our reputation Africa. African leaders should unite together and be one Africans should love one another Africans should stop killing each other and start loving each other because we are one family
